MAGNETIC NAIL POLISHES

«GLARE ON THE WATER»

Rays of the sun are falling to the bottom of the sea and lighting brightly the sand, corals, and flocks of fish. Flickering glare fascinates you. Feel the joy of submerging yourself in a unique world full of hidden miracles. Each nail polish of the new collection will surprise you with the transition of colors and filling. Nine colors that reveal in a new way the beauty of simple things.

MAGNETIC FLEUR

The fleur effect is reflected in the black depth of the MASURA magnetic nail polishes.

Like a haze of silk fabric, like a light veil, a bright magnetic flare rises and leaves behind a mysterious fleur of silvery radiance. Magnetic Fleur has a rich color and doesn't require an additional black base!

BLOOMING GARDEN

Inspired by the beauty of nature and the energy of Chinese garden art. We see beautiful pavilions facing fresh ponds, we enjoy shiny dance of red koi, we notice charming mandarin ducks' floating by. We step into more and more gorgeous landscapes through the moon gates. We are surrounded by blossoming trees and glazed roofs. Now we have time to adore the nature, to remember his kiss, or to dream about the positive future. We feel the energy. Let's throw a lucky coin!

Magnet

If you place the rib of the magnet near the nail, the zone under it will brighten. Place the rib of the magnet near the nail. Hold the magnet 1 centimeter away from the nail plate for 5 seconds.

Place the flat side of the magnet near the base of the nail. The nail polish will change its color in the zone of cuticle. With the help of this method, you can make a beautiful gradient with lightened zone in the base of the nail. Hold the magnet 1 centimeter away from the nail plate for 5 seconds.

Cover the corner of the nail in the cuticle zone with the broad side of the magnet. Nail polish under the magnet changes its color, it becomes richer and darker. Hold the magnet 1 centimeter away from the nail plate for 5 seconds.

If you want to lighten the corner of the nail, place the rib of the magnet near the nail for making a light line. Hold the magnet 1 centimeter away from the nail plate for 5 seconds.
